

TEMPMEKO 2016 Announcement

TEMPMEKO, the international Symposium on Temperature and Thermal Measurements, is one of the most eminent events for sharing ideas, presenting new developments and meeting colleagues from the thermometry community. Its 13th edition, the TEMPMEKO 2016 will be held in Zakopane in Tatra Mountains in Poland, EU from June 26th to July 1st 2016.

The main topics of the Symposium sessions will cover a wide range of subjects related to the temperature metrology like the new definition of kelvin, thermodynamic temperature determinations, novel fixed points, sensors and methods, techniques for traceable temperature dissemination.

For more information about the TEMPMEKO 2016, please visit the official website at:

www.tempmeko2016.pl

The lead developers at the Batemika Measurement Solutions are regular attendees and contributors of the TEMPMEKO Symposium since the symposium in 1999 in Delft, Netherlands. Batemika was first introduced at the TEMPMEKO in 2013, together with our partners from Kambic Metrology.

For the TEMPMEKO 2016, we are proud to announce that Batemika will be a sponsor and exhibitor at the event. You are welcome to visit us at our booth in the second floor of the Hotel Belvedere in Zakopane.

At our exhibition booth you will have the chance to try our leading products, most notably our thermometer readout UT-ONE and bridge mA-meter M100, as well as our custom-made calibration software. We will also use this opportunity to present a few of our new products and prototypes.

At Batemika Measurement Solutions we are always proud to present you our product range, but we also enjoy to exchange ideas and share experiences, or just establish personal relationships within the vibrant thermometry community.

**Looking forward to see you at
TEMPMEKO 2016!**
